

<b>AADT</b> - Average Annual Daily Traffic. Traffic Counts seasonally adjusted to represent the average day of the year. AADT counts represent counts taken
<b>AAWDT</b> - Average Annual Weekday Traffic. Traffic Counts seasonally adjusted to represent the average weekday of the year. AAWDT counts only represent counts
<b>AADT Eastbound</b> - Average Annual Daily Traffic heading Eastbound. Traffic counts heading Eastbound seasonally adjusted to represent the average day of the year.
<b>AADT Intersection</b> - Average Annual Daily Traffic Intersection. Traffic counts taken in the middle of an intersection to capture traffic from all directions. These counts are seasonally adjusted to represent the average day of the year.
<b>AADT Northbound</b> - Average Annual Daily Traffic Northbound. Traffic counts heading Northbound seasonally adjusted to represent the average day of the year.
<b>AADT One-Way</b> - Average Annual Daily Traffic One-Way. Traffic counts heading on a one-way street seasonally adjusted to represent the average day of the year.
<b>AADT Southbound</b> - Average Annual Daily Traffic Southbound. Traffic counts heading Southbound seasonally adjusted to represent the average day of the year.
<b>AADT Southwest bound</b> - Average Annual Daily Traffic Southwest. Traffic counts heading southwest bound seasonally adjusted to represent the average day of the
<b>AAWDT One Way</b> - Average Annual Weekday Traffic One-Way. Counts heading one way seasonally adjusted to represent the average day of the year.
<b>ADT</b> - Average Daily Traffic. These counts are adjusted for day of the week but have not been seasonally adjusted.
<b>ADT Eastbound</b> - Average Daily Traffic Eastbound. Counts that have not been seasonally adjusted traveling eastbound.
<b>ADT Intersection</b> - Average Daily Traffic Intersection. Counts that have not been seasonally adjusted and capture traffic from all directions in the middle of the
<b>ADT Manual</b> - Average Daily Traffic Manual. Counts that have been manually collected in the field by MPSI and converted to ADT counts.
<b>ADT Northbound</b> - Average Daily Traffic Northbound. Traffic counts heading Northbound that have not been seasonally adjusted.
<b>ADT Northeast bound</b> - Average Daily Traffic Northeast bound. Traffic counts heading northeast that have not been seasonally adjusted.
<b>ADT Northwest bound</b> - Average Daily Traffic northwest bound. Traffic Counts heading northwest bound that have not been seasonally adjusted.
<b>ADT One Way</b> - Average Daily Traffic One-Way. Traffic counts on a one-way street that have not been seasonally adjusted.

<p><b>ADT Peak Hour Intersection</b> - Average Daily Traffic Peak Hour Intersection. Traffic counts taken for one hour at one or more peak traffic intersections that have not been seasonally adjusted.</p>
<p><b>ADT Southbound</b> - Average Daily Traffic Southbound. Traffic counts taken going Southbound that have not been seasonally adjusted.</p>
<p><b>ADT Southeast bound</b> - Average Daily Traffic Southeast bound. Traffic counts taken going southeast bound that have not been seasonally adjusted.</p>
<p><b>ADT Southwest bound</b> - Average Daily Traffic Southwest bound. Traffic counts taken going southwest bound that have not been seasonally adjusted.</p>
<p><b>ADT Westbound</b> - Average Daily Traffic Westbound. Traffic counts taken going westbound that have not been seasonally adjusted.</p>
<p><b>AWDT</b> - Average Weekday Daily Traffic. Traffic counts that represent an average weekday of the year but have not been seasonally adjusted.</p>
<p><b>AWDT Eastbound</b> - Average Weekday Daily Traffic Eastbound. Traffic counts that represent an average weekday of the year for eastbound travel but have not been</p>
<p><b>AWDT Northbound</b> - Average Weekday Daily Traffic Northbound. Traffic counts that represent an average weekday of the year for northbound travel but have not been</p>
<p><b>AWDT One-Way</b> - Average Weekday Daily Traffic One-Way. Traffic counts that represent an average weekday of the year for traveling on a one-way road but have not been seasonally adjusted.</p>
<p><b>AWDT Southbound</b> - Average Weekday Daily Traffic Southbound. Traffic counts that represent an average weekday of the year for southbound travel but have not</p>
<p><b>AWDT Westbound</b> - Average Weekday Daily Traffic Westbound. Traffic counts that represent an average weekday of the year for westbound travel but have not been</p>
<p><b>AWET</b> - Average Weekend Traffic. Counts taken on the weekend only, representing weekend traffic Friday-Sunday.</p>
<p><b>Converted Approach Count</b> - Approach counts (counts on each directional leg of an intersection going into an intersection) or turning movement counts (each lane at an intersection including the direction the cars are turning) factored to an average daily</p>
<p><b>Estimated Counts</b> - Traffic counts updated by a source entity from an older year to a more current year based solely on historical data or local expertise.</p>
<p><b>MPSI Estimate</b> - Traffic counts estimated by MPSI.</p>
<p><b>Old Study</b> - Counts that pre-date the creation of the TrafficMetrix database. Most of these are likely AADT or ADT but no information is available to support any firm</p>

<p><b>Peak Hour</b> - Traffic counts taken for one hour at one or more peak traffic periods in a 24-hour period.</p>
<p><b>Peak Hour Eastbound</b> - Traffic counts taken for one hour at one or more peak traffic periods in a 24-hour period for traffic traveling eastbound.</p>
<p><b>Peak Hour Northbound</b> - Traffic counts taken for one hour at one or more peak traffic periods in a 24-hour period for traffic traveling northbound.</p>
<p><b>Peak Hour Southbound</b> - Traffic counts taken for one hour at one or more peak traffic periods in a 24-hour period for traffic traveling southbound.</p>
<p><b>Peak Hour Westbound</b> - Traffic counts taken for one hour at one or more peak traffic periods in a 24-hour period for traffic traveling westbound.</p>
<p><b>SADT</b> - Summer Average Daily Traffic. Traffic counts deliberately taken during a summer's peak volume but are not seasonally adjusted.</p>
<p><b>Vendor Estimate</b> - A source estimates traffic volumes without conducting any new actual traffic surveys. These estimates are created using local expertise or a percentage factor to increase or decrease the counts.</p>
<p><b>WADT</b> - Winter Average Daily Traffic. Traffic counts deliberately taken during a winter's peak volume but are not seasonally adjusted.</p>
